Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:

[Claims 1 and 7]: An apparatus for converting an analog image data into a digital image data according to at least one color characteristic and at least one image data characteristic in a CMOS image sensor including a pixel array having M (row line) x N (column line) color pixels, wherein the color pixels include a first color pixel for sensing a first color, a second color pixel for sensing a second color and a third color pixel for sensing a third color, the apparatus comprising: an analog reference voltage generator having first to third reference voltage generators each for generating first to third analog reference voltages corresponding to the first to third color pixels, wherein each one of the first to third analog reference voltages is generated as a different value and with a different decline rate from the other analog reference voltages according to the at least one image data characteristic, N number of selectors, each for selecting one of two inputted analog reference voltages in response to a select control signal which are inputted based on the two color pixels in the column pixel array, wherein the two inputted analog reference voltages respectively correspond with two of the first to third color pixels included in the column pixel array in combination with other claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
